Sustainable Lies? Cut All Ties

**CISL claims to be working towards a
“sustainable future”, while they partner with
the fossil fuels and arms sectors and
companies such as:**

**Coca Cola – the world's biggest
plastic polluter; commits land and
water abuses and then murders
activists who oppose this**

**Insures Drax (the UK's biggest
carbon emitter);
on the BDS list for complicity in
Israeli apartheid and genocide**

**Subject of legal action for
poisoning water, land and air
across several continents**

#SustainableLies

We demand:

- 1.** Cut all financial, operational and reputational ties with Coca-Cola, Anglo American and AXA
- 2.** Affirm publicly a commitment to ending all work with fossil fuel companies, including educational and consultational work
- 3.** End all work with organisations who manufacture or use weapons. This extends to aerospace companies with arms departments, national militaries and those companies known to employ paramilitary violence

What kind of future do they want to sustain?

Clue: it's one where the richest in society profit from the harm of the global majority.

Follow ORCA on social media to follow our campaign and get involved
